

**PRODUCT:** OC CANISTER-MK3

#### DESCRIPTION:

Chemical spray training exercises are physically replicated with the VirTra laser-based OC training device in the SABRE® MK3™ chemical spray accessories. Manufactured using the OEM training cannister, cannister tops and activation button pressure prevents unintended training scars and the laser is mounted at the same launch angle for the true-to-life training experience. These replicated features lead to each laser-based OC device matching the exact form, function and weight of the OEM MK3 cannister. Maintenance is more efficient with a re-chargeable battery, USB charger and On/Off/ Low battery indicator light with automatic shutoff.

#### SPECIFICATIONS:

1. Manufactured with OEM MK3 housing
2. Weight-tested to match weight of OEM spray cannister
3. Laser is mounted at the launch angle to match an actual MK3
4. Matches activation pressure of real OC canister
5. On/Off/Low battery indicator light with automatic shut off
6. Re-chargeable with accompanied USB charger
7. Fully-functional in low light situations
8. Drop tested at six feet to ensure true-to-life training durability
9. Class 1A (<0.850mw) lasers safe under all conditions of normal use
10. One-year from date of purchase service agreement- additional available

Product #:	VSNLW-OCC	Height:	4.25 in
Color(s):	Bluetop	Weight:	3.2 oz
Operate/storage temperature:	14°F to 104°F (-10°C to 40°C)	Diameter:	1.5 in
Operating relative humidity:	85% non-condensing		

#### FEATURES:

1. OEM housing for form, fit, weight and training function for realism in training
2. Matches OEM spray launch angle for training realism
3. OEM realistic activation pressure help to prevent unintended training scars
4. USB charger and re-chargeable battery for low maintenance and little downtime extending training sessions
5. On/Off/Low battery power indicator light with automatic shut off for real-time maintenance features
