

VirTra

ProTruss

Simulator Setup Simplified

All the benefits of VirTra's simulators, but with a smaller footprint and no room modifications required.

The ProTruss system streamlines structural assembly by being lighter, smaller, with lower ceiling requirements, and more flexible than previous offerings.

With ProTruss, VirTra lowers the barrier of entry for agencies adopting simulator training. Our engineering team considered feedback from customers around the country to eliminate pain points and make VirTra the standout option for law enforcement and military virtual training efforts at any scale.

Superior Across the Board

Eliminates need for ceiling mount, meaning no construction modifications

Compatible with HD & 4k sims, Laser & Lamp Short Throw Projector

Allows for shorter, more reliable cables and superior cable management

Rugged, simplified design

New lightweight aluminum design can be fastened to the floor for added stability

Support for ceilings as low as 9'

Unlocks new room options - 20' x 23' (V-300) and 20' x 17' (V-180)
